

Многофункциональная  
издательская  
платформа полного  
цикла и услуги

# Почему ARPHA? 15 главных отличительных особенностей

1. Программная платформа полного цикла + услуги, предоставляемые сотрудниками
2. White-label или совместное издательство
3. Оперативная гибкость
4. Доступные и гибкие ценовые модели
5. Разнообразные бизнес-модели
6. Языковая гибкость
7. Продвинутое семантическое совершенствование контента
8. Машиночитаемый контент
9. Автоматическое индексирование и архивирование
10. Личный подход в технической поддержке и консультировании
11. Услуги по продвижению и научной коммуникации
12. Различные метрики пользования в режиме реального времени
13. Статистики и отчеты по развитию журнала
14. Многофункциональная платформа
15. Постоянное добавление новых интеграций и инструментов

# 1. Программная платформа полного цикла + услуги, предоставляемые сотрудниками

- **Единый и удобный** пользовательский интерфейс
- Авторство, рецензирование, редактирование, верстка и архивирование происходит **полностью** в среде онлайн-платформы ARPHA
- **Автоматические** уведомления и напоминания
- **Безопасность данных** и соответствие GDPR

# Ключевые модули и группы услуг

Публикационная платформа и хостинг

Интерфейс подачи рукописи

Платформа управления редакторским процессом

Платформа управления макетированием и вёрсткой

Распространение, индексирование и архивирование

Различные операционные и бизнес-модели

Метрики и статистики журнала

Маркетинг и продвижение

Поддержка пользователей, руководства, тренинги

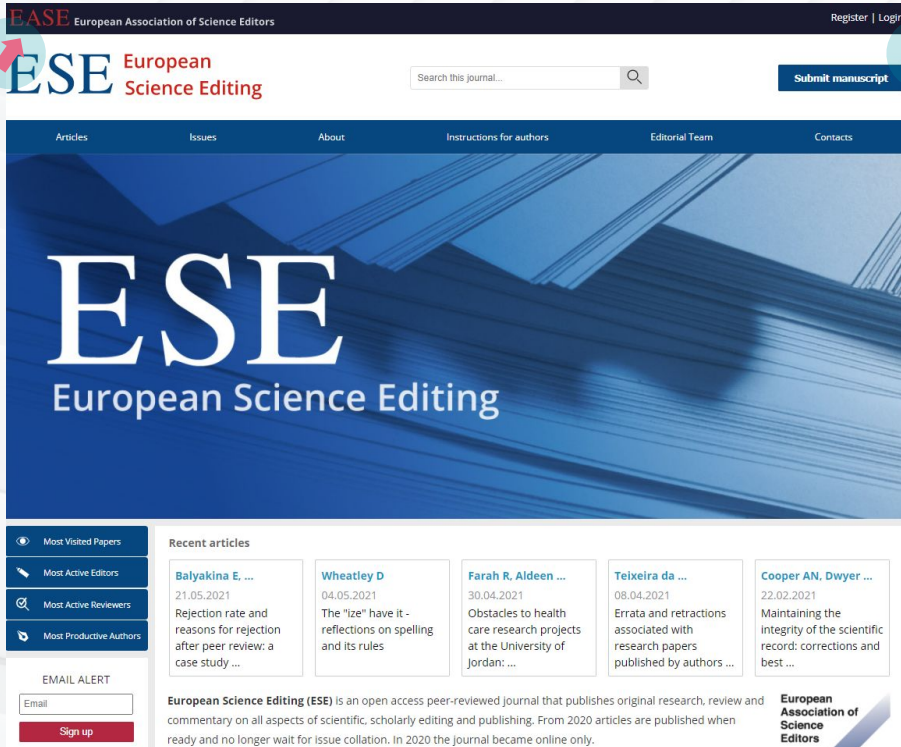

## 2. White-label или (co)издательство с Pensoft

- С ARPHA Ваш портал для публикации журнала, конференции или же платформа для препринтов может функционировать **под собственным логотипом и импринтом,**
- или же **Pensoft может выступать в качестве (co)издателя** для большего признания, распространения и развития журнала как части портфолио Издателя.

# Пример: White-label vs. (co)издательство

The screenshot shows the homepage of the European Science Editing (ESE) website. At the top, there is a navigation bar with the EASE logo and the text "European Association of Science Editors". Below this is the ESE logo and "European Science Editing". A search bar and a "Submit manuscript" button are visible. The main content area features a large blue banner with the ESE logo and "European Science Editing". Below the banner, there are navigation links for Articles, Issues, About, Instructions for authors, Editorial Team, and Contacts. A sidebar on the left contains "Most Visited Papers", "Most Active Editors", "Most Active Reviewers", and "Most Productive Authors". The main content area displays "Recent articles" with a list of five articles, each with a title, author, and date. At the bottom, there is an "EMAIL ALERT" sign-up form and a brief description of the journal's mission.

European Science Editing (ESE) is an open access peer-reviewed journal that publishes original research, review and commentary on all aspects of scientific, scholarly editing and publishing. From 2020 articles are published when ready and no longer wait for issue collation. In 2020 the journal became online only.

## Influence of migration processes on the demographic development in the Yamal–Nenets Autonomous Okrug

Dmitry V. Pomazkin<sup>1</sup>

<sup>1</sup> JSC NPF “Gazprombank Fund”, Moscow, 117556, Russia

Received 26 February 2021 ♦ Accepted 31 March 2021 ♦ Published 21 April 2021

**Citation:** Pomazkin DV (2021) Influence of migration processes on the demographic development in the Yamal–Nenets Autonomous Okrug. Population and Economics 5(1): 90–97. <https://doi.org/10.3897/popecon.5.e65133>

### Abstract

The article discusses the influence of migration on the development of demographic processes in the Yamal–Nenets Autonomous Okrug. The study shows that the current level of migration will lead to a decrease in the population due to the uneven sex and age structure of the population of the region. In this context, the author presents estimates of the number and costs of shift workers, that need to be attracted to compensate for the economically active population reduction.

### Keywords

migration, population size, mathematical modelling

## Влияние миграционных процессов на демографическое развитие Ямало-Ненецкого автономного округа

Дмитрий В. Помазкин<sup>1</sup>

<sup>1</sup> АО НПФ «Газпромбанк-фонд», Москва, 117556, Россия

Получено 26 February 2021 ♦ Принято в печать 31 March 2021 ♦ Опубликовано 21 April 2021

**Цитирование:** Pomazkin DV (2021) Influence of migration processes on the demographic development in the Yamal–Nenets Autonomous Okrug. Population and Economics 5(1): 90–97. <https://doi.org/10.3897/popecon.5.e65133>

### Аннотация

В статье рассматривается влияние миграции на развитие демографических процессов в Ямало-Ненецком автономном округе. Показано, что сложившийся уровень миграции приводит к сокращению численности населения в силу диспропорций в половозрастной структуре региона. Приведены оценки численности работников, привлекаемых вахтовым методом для компенсации сокращения численности экономически активного населения, и связанных с ними затрат.

### Ключевые слова

миграционные процессы, численность населения, математическое моделирование

# 7. Семантические улучшения HTML / XML контента

**Семантически улучшенный HTML** контент предоставляет визуализации и ссылки для удобства доступа пользователя без отрыва от чтения к таким частям статьи как:

Short Communication

Acta Ichthyologica et Piscatoria 51(1): 113-118  
<https://doi.org/10.3897/aiep.51.63504> (31 Mar 2021)

In this study, the record of *A. pharaonis* is documented for the first time in the Libyan waters, being the species not yet reported in recent literature on marine non-indigenous species of the country (Shakman et al. 2019 and references therein; Abdelghani et al. 2020; Bariche et al. 2020; Osea et al. 2020). The locations of the two subsequent findings of *A. pharaonis* described in this paper represent the westernmost Mediterranean area of colonization of this non-indigenous fish along the southern shores of the basin.

## Material and methods

On 19 September 2020, a spear fisher submitted photos to the social media citizen science platform for Libyan waters called 'Marine Biology in Libya' (<https://www.facebook.com/MarineBiologyinLibya>) of an unknown fish he had just caught. The catch was made on rocky bottom interrupted by sand at a depth of approximately 1.5 m, along the coast of the Al Burdi (Bardia) region in the far eastern extremity of Libya, not far from the Egyptian border (31°46'45"N, 25°04'40"E) (Fig. 1). The same sports fisher preserved in a freezer the specimen (specimen A), which was retrieved by one of us (SAM), to enable the assessment and measurement of its main morphometric and meristic attributes. Measurements were taken with a caliper to the nearest 0.01 mm, following Bauchot (1987). The sample is stored in formaldehyde solution at the fish collection of the Omar Al-Moukhtar University, El Bayda, Libya. The specimen was identified following Gon (1986, 2000), Gon and Randall (2003), and Golani et al. (2013).

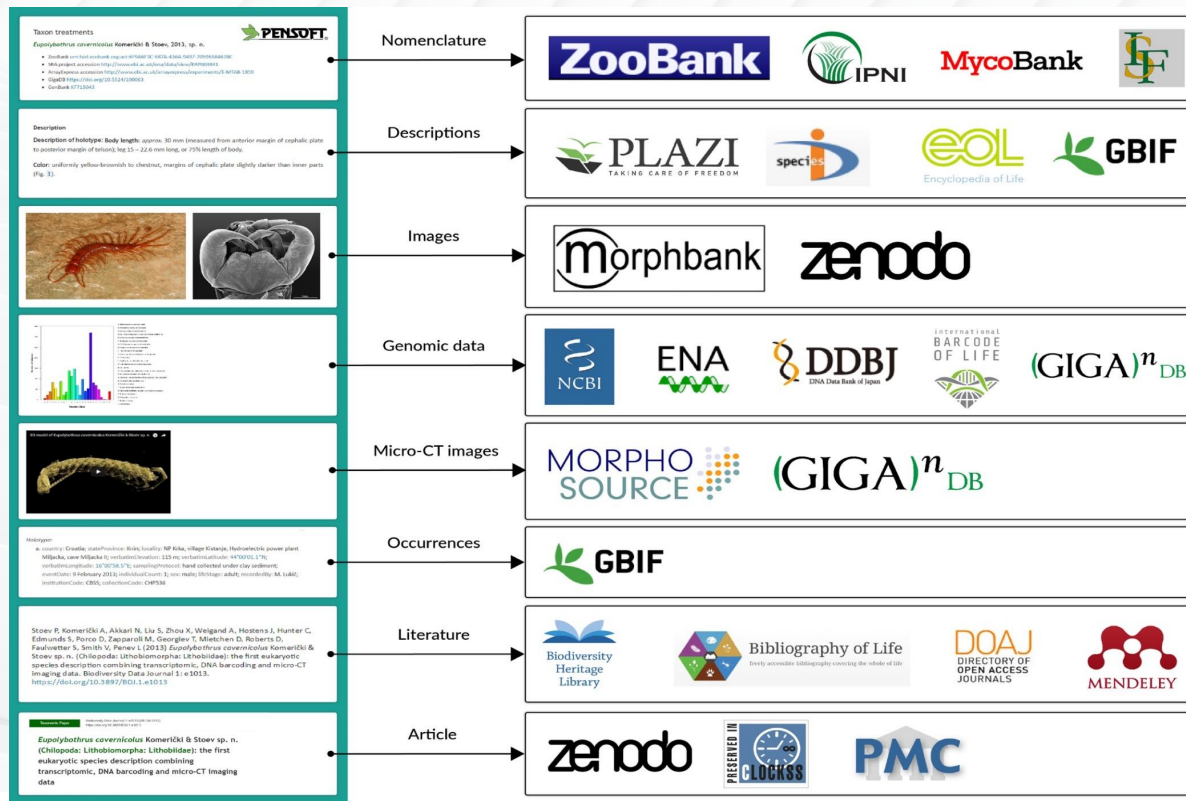

The screenshot shows a web interface for a scientific publication. At the top, there are buttons for 'XML', 'PDF', and a shopping cart icon. To the right are social media icons for Twitter, Facebook, YouTube, and others. Below these are tabs for 'Contents', 'Article Info', 'Citation', 'Metrics', 'Comment', and 'Related'. Underneath are more specific tabs: 'Figs', 'Map', 'Taxa', 'Refs', and 'Cited'. The 'Map' tab is active, displaying a map of the Mediterranean Sea region. A red location pin is placed on the coast of Libya, near the Egyptian border. The map shows countries like Italy, Greece, Turkey, Libya, and Egypt. A search bar is visible at the top of the map area. The Google logo is at the bottom left of the map, and 'Map data ©2021 Google Terms of Use' is at the bottom right.

## 8. Машиночитаемый контент

- Все публикации также доступны в формате JATS XML, который облегчает обнаруживаемость статьи для компьютерных и поисковых алгоритмов.
- Дополнительно, контент автоматически захватывается и передается в релевантные базы данных.

# Машиночитаемость – ключ к улучшенному распространению контента

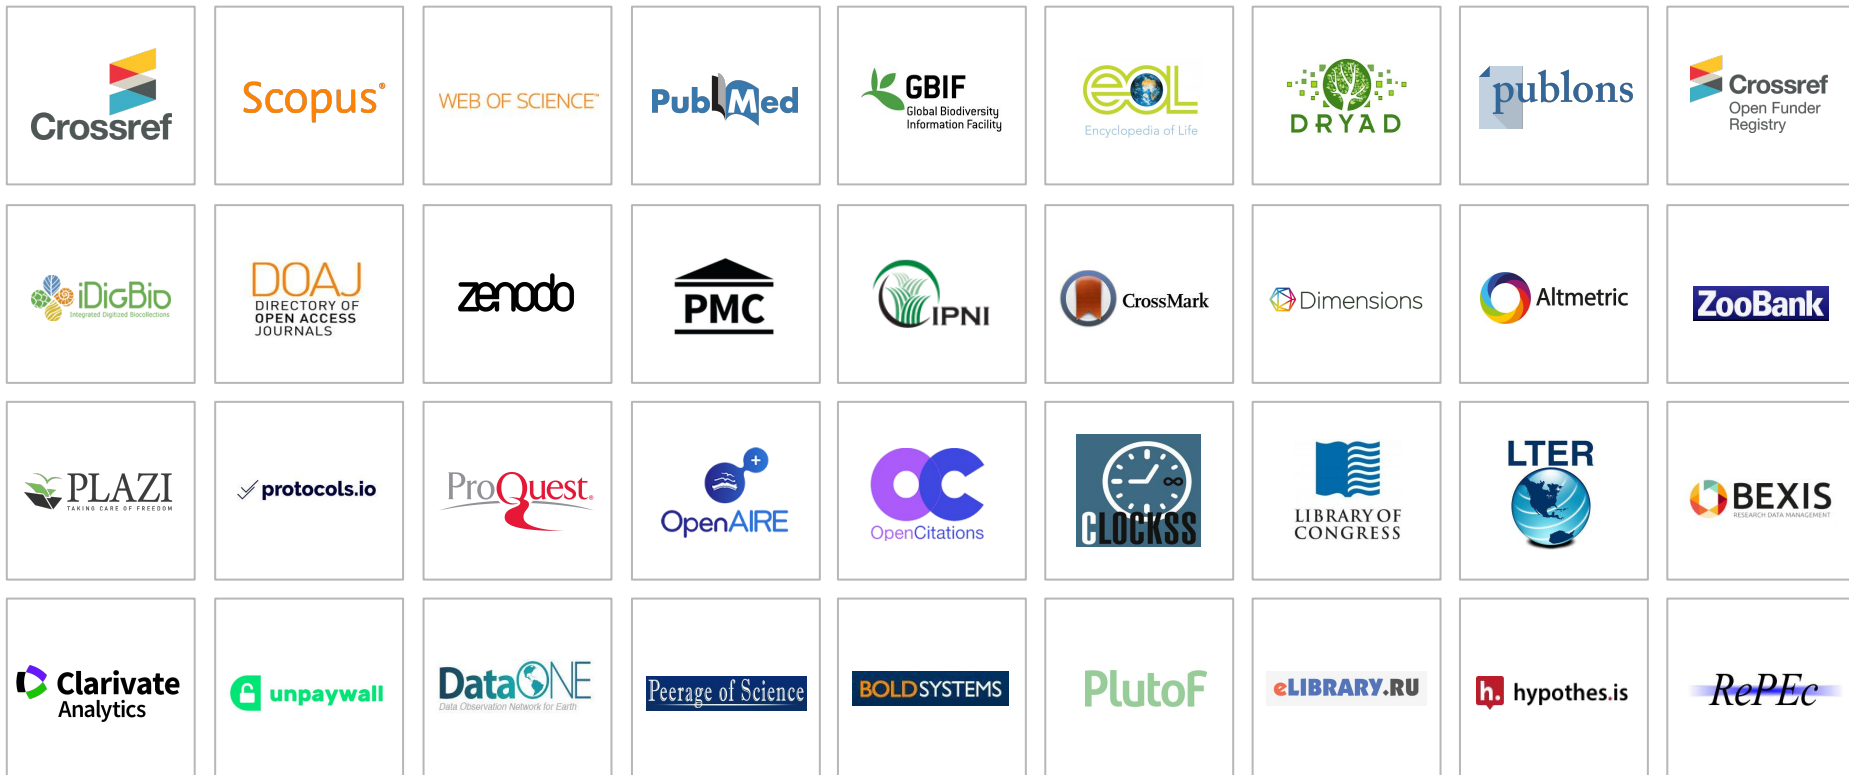

## 9. Автоматическое индексирование и архивирование

- После публикации контент **автоматически** экспортируется в более **60 ведущих баз данных**, предоставляющих услуги **индексирования и архивирования**.

# Индексирование и архивирование в 60+ ведущих базах данных

# 10. Личный подход в технической поддержке и консультировании

- Личный подход, поддержка и **ответ в течении одного рабочего дня** от специально назначенного сотрудника
- Оперативное обучение и техническая поддержка
- **Консультирование и поддержка** в развитии журнала, индексировании и архивировании, маркетинге и продвижении

## Senckenberg Nature Research Society moves three of its journals to the ARPHA Platform - April 9, 2021

The Senckenberg Nature Research Society, one of the largest natural research associations in Germany, has moved three of its international, open-access scholarly journals to the publishing platform ARPHA, following a recent contract with the scientific publisher and technology provider [Pensoft](#).

Having opted for the white-label publishing solution, the journals remain under the brand of the Society and the Senckenberg Natural History Collections Dresden, one of the oldest natural-science museums in the world. Despite transitioning to a new platform, the past volumes of the journals remain accessible from a link on their website homepages.

Following their recent move to the Pensoft-developed publishing platform, the journals - Arthropod Systematics & Phylogeny, Vertebrate Zoology and Geologica Saxonica - have not only acquired their own glossy and user-friendly websites, but have also taken advantage from ARPHA's signature fast-track, end-to-end publishing system, which is to benefit all journal users: authors, reviewers and editors alike. In addition, the journals are already using many of the unique services offered by ARPHA, including publication in PDF, semantically enhanced HTML and machine-readable XML formats; advanced data publishing; sub-article-level usage metrics; automated export of sub-article elements and data to key aggregators; web-service integrations with major indexing and archiving databases; and others.

New Snail Species Named After Novak Djokovic: 'I Always Tried To Be Fast!' | ATP Tour | Tennis

NEWS RELEASE 15-APR-2021

## Novak Djokovic now has a tiny new snail species named after him

PENSOFT PUBLISHERS

Research News

PRINT E-MAIL

Do freshwater snails make good tennis players? One of them certainly has the name for it.

Enter *Travunjiana djokovici*, a new species of aquatic snail named after famous Serbian tennis player Novak Djokovic.

Slovak biospeleologist Jozef Grego and Montenegrin zoologist Vladimir Pestic of the University of Montenegro discovered the new snail in a karstic spring near Podgorica, the capital of Montenegro, during a field trip in April 2019. Their scientific article, published in the open-access, peer-reviewed journal *Subterranean Biology*, says they named it after Djokovic "to acknowledge his inspiring enthusiasm and energy."

"To discover some of the world's rarest animals that inhabit the unique underground habitats of the Dinaric karst, to reach inaccessible cave and spring habitats and for the restless work during processing of the collected material, you need Novak's energy and enthusiasm," the researchers explain.

## Slow-vak Djokovic - check out the snail named after a tennis star

A newly discovered rare species of snail has been named after tennis pro, Novak Djokovic but he's not the only celeb to have a creature named after them. Check out these pics.

Novak Djokovic is known for his relentless speed on the court, so it might be a surprise to hear that one of the world's slowest creatures has been named after the tennis pro. The new species was discovered in Montenegro and has been named 'Trovunijana Djokovic'. The little mollusc was spotted at a spring near the country's capital Podgorica and has been classed as vulnerable according to the International Union for Conservation of Nature's (IUCN) Red List of Threatened Species. The scientists who found it said they named the freshwater snail species after Djokovic 'to

## FREE READING AND ENHANCED EXPERIENCE

The **Advanced Books** platform publishes new books or re-publishes books previously available in paper or PDF only in an advanced and semantically enhanced HTML and machine-readable XML formats. In order to accelerate open access, data publication, mining, sharing and reuse, **Advanced Books** builds on the novel approaches developed by Pensoft's journals.

## Mapping Ecosystem Services

Benjamin Burkhard, Joachim Maes

### Foreword

The world's economic prosperity and well-being are underpinned by its natural capital, i.e. its biodiversity, including ecosystems that provide essential goods and services for mankind, from fertile soils and multi-functional forests to productive land and seas, from good quality fresh water and clean air to pollination and climate regulation and protection against natural disasters. This is the reason why, for example, the first priority objective of the 7th Environment Action Programme (7th EAP) of the European Union (EU) is to protect, conserve and enhance the EU natural capital. In order to mainstream biodiversity in our socio-economic system, the 7th EAP highlights the need to integrate economic indicators with environmental and social indicators, including by means of natural capital accounting, to measure the changes in the stock of natural capital at a variety of levels, including both continental and national levels.

The EU Biodiversity Strategy to 2020 called on Member States to map and assess the state of ecosystems and their services in their national territory by 2014, with the assistance of the European Commission. The economic value of such services should also be assessed, and the integration of these values into accounting and reporting systems at EU and national level should be promoted by 2020 (see [Target 2](#), Action 5).

This specific action aims to provide a knowledge base on ecosystems and their services in Europe to underpin the achievement of the six specific biodiversity targets of the strategy as well as including a number of other sectoral policies such as agriculture, maritime affairs and fisheries and cohesion.

Mapping ecosystem services is essential to understand how ecosystems contribute to human wellbeing and to support policies which have an impact on natural resources. In 2013, an EU initiative on Mapping and Assessment of Ecosystems and their Services (MAES) was launched and a dedicated working group was established with Member States, scientific experts and relevant stakeholders. The first delivery was the development of a coherent *analytical framework* to be applied by the EU and its Member States in

**ARPHA Conference Abstracts (ACA)** is a novel, open access, human- and machine-readable platform designed to assist conference organisers and participants in authoring, submission, peer review, editorial management, publication and dissemination of conference abstracts in any field of science, published with DOI in semantic HTML, XML and PDF formats.

**ARPHA Conference Abstracts** allows for innovative publication of extended abstracts that may in addition to the narrative include also data, images, videos and multimedia. Video recordings of conference talks or graphic files of poster presentations can be uploaded in bulk after the conference and visualized on each abstract page. Conference organisers are given the opportunity to subdivide their abstract collections by

**Biodiversity Information Science and Standards (BISS)** is an innovative open access journal publishing abstracts related to biodiversity standards, methods, guidelines, models and applications in biodiversity informatics submitted to Biodiversity Information Standards (TDWG) for presentation at annual meetings.

The journal also publishes conventional research articles. They will only be considered if they illustrate the development or application of

# Многофункциональная платформа: Препринты

<https://preprints.arphahub.com/>

- При подаче рукописи в журнал, опубликуйте препринт при помощи отметки соответствующего поля галочкой
- Двусторонняя связь между статьей и препринтов через CrossRef
- Препринты индексируются в соответствующих базах данных (например Google Scholar, OpenAIRE, ScienceOpen)

# 15. Новые интеграции и постоянное совершенствование платформы

- Мы постоянно рассматриваем обратную связь от клиентов и работаем над совершенствованием функций ARPHА.
- Также, мы проводим интеграцию различных полезных издательских инструментов с платформой ARPHА для максимального удобства пользователей.

# Новые функции, разработанные ARPHA

## ARPHA and Pensoft launch one-stop preprint & journal submission in selected journals

Authors in participating ARPHA-hosted journals can now post their manuscripts on ARPHA Preprints upon submission in a click

## Workload for reviewers and subject editors

# Интеграция со сторонними сервисами

## Contributor roles for co-authors Contributor Roles Taxonomy

Determined to always give credit where credit is due, while promoting transparency in academia and scholarship, we enabled submitting authors to assign each co-author with a role, depending on his/her primary contribution to the preparation of the manuscript. Thus, once published, a paper will clearly indicate the author who has, for example, conceptualised the study, developed the utilised software or written the original draft.

The options available in the drop-down menu follow CRediT (Contributor Roles Taxonomy): a high-level taxonomy, which includes 14 roles typically assumed by contributors to scholarly output.

STEP 3: Submission metadata

Following a recent integration with the novel, social network-style research discovery app [Researcher](#), the scholarly publishing platform ARPHA has taken yet another step to ensure scholarly publications from across its open-access, peer-reviewed journal portfolio are as easy to find and read as possible. Now, research papers published in all [Pensoft's](#), as well as all other [journals hosted on ARPHA](#), can reach the 1.8 million current users of Researcher directly on their screens.

Similarly to the world's best known and used social media networks: Twitter, LinkedIn and Facebook, Researcher allows its users, scientists and academics, to follow

## All Pensoft journals integrated with Publons to recognize your contribution as a reviewer

Pensoft Editorial Team

January 21, 2016

Tweet

With both Pensoft and Publons aiming to facilitate scientific research and its introduction to the wide world, it only makes sense for the two to join efforts in a campaign to speed up publications, while giving the rightful credit to reviewers. From now on, anyone who makes this contribution to any of the 15 Pensoft journals will be able to opt-in to get credit for their peer reviews on Publons.

A better home for your journal!
